ANTI-CORRUPTION
STANDING COMMITTEE**

**ANTI-CORRUPTION STANDING COMMITTEE OF THE
WORLD FEDERATION OF ENGINEERING ORGANIZATIONS**

STATEMENT OF SUPPORT FOR ISO 37001

1. At a meeting of the Anti-Corruption Standing Committee of the World Federation of Engineering Organizations (WFEO) held in Paris on 10th December 2014, it was agreed that the Committee welcomes and supports the initiative of the International Organisation for Standardization (ISO) to develop an international anti-bribery management systems standard ISO 37001.
2. WFEO has been appointed as a liaison organisation to the ISO project committee which is developing the standard, and is participating in the drafting meetings.
3. The Committee believes that ISO 37001 will be a vital tool which can help organisations demonstrate that they have implemented effective anti-bribery controls.
4. The Committee believes that ISO 37001 will be most effective if it is published as a requirements standard which is capable of independent certification.
5. The Committee calls on its representatives from its member countries to contact their national standards bodies and encourage them to support the publication of ISO 37001 as soon as possible as a requirements standard.

10th December 2014

Martin Manuhwa: Chair of WFEO Anti-Corruption Standing Committee

Kamel Ayadi: Past-Chair of WFEO Anti-Corruption Standing Committee and WFEO representative on ISO anti-bribery project committee

World Federation of Engineering Organizations
Anti-Corruption Standing Committee

The World Federation of Engineering Organizations (WFEO) is a non-governmental international organization that brings together national engineering organizations from over 90 nations and represents some 15 million engineers from around the world.
